DAVE MAYNARD

FRONT-END ENGINEER

EXPERIENCE

FRONT-END ENGINEER

Amazon | 2021 - Present

I developed a content management system for sellers to create rich content and add personalized branding to their product detail pages on Amazon. The app is built with React, TypeScript, CSS-in-JS, Redux, and Redux-Saga. Used by over 68,000 daily active users who publish content to 20 million products on Amazon.com every month, it's supported in 21 marketplaces around the world with multiple locales in each. I also wrote technical design documents and mentored new team members.

WEB DEVELOPMENT ENGINEER

Amazon | 2020 - 2021

I developed the front-end for an internal product built on Salesforce that allowed employees to pursue their career goals by applying for scholarships at academic institutions of their choice. Using HTML5, JavaScript, Sass, Apex, and Visualforce, I built dynamic experiences for every user from 14 countries and in 9 languages. Over 300,000 employees have enrolled in the program since it was created.

LEAD FRONT-END WEB DEVELOPER

Sagepath Reply | 2017 - 2020

I led a team to develop component-based websites with designers and other developers. We created responsive solutions using HTML, Sass, Less, JavaScript, Vue.js, jQuery, AnimeJS, Ionic, Handlebars, and Gulp.

FRONT-END WEB DEVELOPER

Insight Global | 2016

I developed part of a web application using Angular, TypeScript, HTML, and Sass. I also wrote providers that make HTTP requests to Java RESTful microservices.

FRONT-END WEB DEVELOPER

LINDY Interactive | 2015

I worked with a team of designers to develop several websites using WordPress, HTML, CSS, and jQuery.

WEB DEVELOPER

SA IT Services | 2012 - 2014

I created an ETL automation web application that performed batch data entry 5X faster than manually possible. I built it using C#.NET, ASP.NET, HTML, CSS, jQuery, PowerShell, AJAX, Active Directory, Exchange, and Lync.
